DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group II is acknowledged. The traversal is on the ground(s) that the method claims necessarily use the product and vice versa. Also stated that the fields of search are co-extensive. Finally, that the additional use of the apparatus provided by the Examiner has nothing to do with the presented claims. This is not found persuasive because the product (apparatus) could be used in many manners not disclosed in the instant methods. For instance, the first mask image could be exposed repeatedly in the same die locations. The apparatus could also be used in an overall exposure to help in wafer re-working. This may be a speculative use, but it is a viable use nonetheless. It is also clear that to examine apparatus embodiments would require an undue burdensome search and examination when considering the process per se.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

2. Claims 20-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim language is circular in nature and confusing as to the metes and bounds of the method. It is not seen how all die lots are exposed, nor how the alignment takes place multiple

steps before utilizing the second mask. Claim 24 is extremely confusing since the first mask is used to expose the entire field, then required for exposure again in a non-exposed area. It is not seen how the entire field was already exposed to this image and then re-exposed in a non-image area.

3. No prior art rejection is issued at this time in view of the indefinite scope of the claims.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher G. Young whose telephone number is 703-308-2984. The examiner can normally be reached on Monday-Friday.
